- **From Marcia Russell:** It is a most gracious miracle that after all this time we remain connected... thus the web we had woven was a solid web that continues to connect respective groups of DECies together as in; the west coast crowd; the CXO gang; AZ gang; CA contingents, the Florida snow birds and the myriad of Cape Cod connected affiliations and some Euro connections and others are still in place. I think it is quite special to have such continued deep rooted connections after 20 years. I have indeed been fortunate in that I had a few years back a circa 1960's Itek reunion regarding the Hubble and spy satellites projects. I was involved with the team as a key person doing the critical data entry that had to be correct. The event was hosted by General Abrams. - Eagle-eyed **Mary Cole** forwarded a link to **Steve Kallis'** Digital film Library on [www.archives.org](http://www.archives.org). [Along the Shorelines of the Skies](#) is an industrial film showing how a PDP-8 is used to calibrate instrumentation used in space probes. Also a [PDP-12 application tracking pulsars is featured](#). The 50-year anniversary of photos from Mars and Mariner occurred in mid-July.
