

Hello -

I am writing regarding my brother, David Plumer, a former employee for DEC for 30 years. He was one of the first employees and was recruited shortly before or after his graduation from MIT. He was your "Good Will Ambassador " ( sales and trouble shooting I guess !) for DEC around the world ! His career lasted for 30 years.

Sadly and tragically he passed away on Nov. 1st , 2015 of complications from Parkinson's Disease. He was only 73 years of age. It was a heartbreak beyond words - as he suffered from some dementia and as some may remember he was a brilliant mind and great communicator. We lost him more and more over a four year period of great sadness.

He regaled us all for many years with slides of his worldly travels, and his stories of encounters on behalf of DEC , one such being a presentation for the Mafia . At the conclusion of this presentation one of the "Don's" men said to Dave in the presence of the Don - "the Don is pleased " ! Whew on that one !! I can only hope you made a big sale that day !!! LOL

Anyway, just wanted to pass this information on , as I think of Dave every day and think that some of you may have worked with him. He was well liked and loved by many people and one of a kind for sure !

Hope this reaches some one who may have known Dave and the information of his death will be passed on.

Sincerely,

Ellen M. Bollen (Dave's sister)
